Books About Plants

Objective:

- Show interest in reading-related activities.

Materials:

- picture books about plants
- self-stick notes
- pencils or crayons

Collect several picture books about plants, including alphabet and number books, if possible.

Read this **Center Card** aloud to children, pointing to each step as you explain it. Then set the **Center Card** in the Reading Center along with the materials children will need to complete the activity.

1 Choose a book to read. Think about which picture your favorite and why.

2 Write your initials or name on a self-stick note. Place it on the outside edge of your favorite picture.

3 Tell a classmate about the picture you chose. What do you like about it? What do you know about the plant it shows?

When children are finished with the activity, remind them to put the books back where they found them. Explain that they can leave their self-stick notes on the book pages so other children can see the pictures they chose.
